

# DS Durable Surfaces

Repair | Technical | Coatings

## THE CONCRETE AUTHORITY

When deciding on a finished floor, considerations have to be made for aesthetics, cleanliness, and functionality - what if you could have all three? Since 2001, Durable Surfaces has been at the forefront of coating system technologies, providing world class systems from beautiful design finishes to industrial strength coatings. From your warehouse battery charging station, to your executive offices, Durable Surfaces can provide the wow factor you are looking for. Durable Surfaces is **The Concrete Authority**.

## COATING SERVICES

**Epoxy**

**Urethane Cement**

**High Build Systems**

**SQF & HACCP Audits**

**Chemical Resistant**

**Non Slip Solutions**

**Moisture Barrier**

**Line Striping**

**Low VOC Solutions**

**Decorative Options**

## CLIENTS

## INDUSTRIES WE SERVE

PHARMACEUTICAL

FOOD &  
BEVERAGE

AUTOMOTIVE

COLD  
STORAGE

DISTRIBUTION  
& LOGISTICS

OIL & GAS

INDUSTRIAL &  
COMMERCIAL

## CLIENT-FOCUSED

Our team holds partnerships to the highest standard, making Durable Surfaces a very **client-focused** environment.

## OPTIMAL

We take the extra time needed to understand our clients expectations, providing **optimal** service to our customers.

## ABUSE

Acid leaks, chemical spills, thermal shock, and even day to day usage, can **abuse** a concrete surface, requiring the **right** coating system to protect the floor.

## TECHNIQUE

Our expertise lies in providing the best **techniques** and execution as they are critical components of a proper coating system install.

## INFORMATIVE

Durable Surfaces is not only effective, but also **informative** in our design solutions. We take the time to educate our clients on the best fit system for their facility.

## NON-SLIP

Floors installed with **non-slip** traction additive increase site safety and decrease liability.

## GREEN SOLUTIONS

As a part of our **green solutions** initiative, we aim to use eco-friendly processes and chemicals to effectively get the job done, while keeping everyone safe.

## SYSTEMATIC

Our team is **systematic** in its approach to every project. Coating systems require strict procedures from start to finish.

## LINE STRIPING

*Line striping provides a designated space for battery charging areas, walkways, and equipment parking spots. These well defined areas are a visual representation to ensure the safety of your team, especially in a high traffic facility.*

## DECORATIVE

*Our team provides decorative options, such as a metallic finish, colored quartz system, or a decorative flake. These solutions are very popular in areas where you want your facility to stand out and be aesthetically pleasing to the eye.*

## SAFE QUALITY FOODS

*When it comes to food grade facilities, we understand that passing SQF and HAACP audits are of high importance. Our team assists our clients in achieving their criteria goals by installing a coating system to meet compliance.*

## MOISTURE BARRIER

*Moisture barrier can be installed on any type of floor - it protects your floor from moisture bleeding through the concrete. Helps reduce the moisture to provide your coating with a much stronger bond.*

## EPOXY

*Epoxy coating bonds seamlessly to existing floor surfaces, creating durable, high-quality surfaces that are sure to last for years. Epoxy flooring is also very strong and resistant to wear and tear so it makes an ideal choice for commercial and industrial spaces.*

## HIGH BUILD SYSTEM

*High Build systems bring extra protection and durability to a facility's floor due to it's coating thickness. These systems are recommended for heavy manufacturing centers, chemical labs, food processing facilities, and areas susceptible to heavy spills.*
